Dear student,

In September 2012 you will start your studies at Utrecht University in the Graduate School of Natural Sciences in one of our master's programmes, or as an exchange student taking courses or doing a research project in one of our research institutes. On behalf of the Graduate School of Natural Sciences and the School's Student Associations we would like to welcome you and invite you to the introduction programme on Monday the 3rd of September. Please note that **participation in this introduction programme is mandatory**. (Utrecht University also offers an introduction programme only for international students and exchange students on Thursday the 6th of September. Both introductions are mandatory and complementary.) You can find regularly updated information at www.a-eskwadraat.nl/masterintroduction.

The Graduate School will introduce you to the school, its departments and its master's programmes, to several key staff members and student associations. It will also ensure that you are familiar with important student facilities, that you are enrolled for the courses of your choice, and it will serve as a way of introducing you to the fellows of your specific master's programme. The Graduate School considers your active participation as a very important aspect of the first weeks of classes at our institution.

Please inform yourself and **register as soon as possible** for this introduction at www.a-eskwadraat.nl/masterintroduction where you will also find information about other activities of your student association such as for example the purchase of books.

Apart from the introduction programme, we have more to offer! You are cordially invited to join our social programme including a Dutch BBQ on Friday the 14th of September. We believe that your participation enables you to get familiarized with your fellow students across the boundaries of your master's programme. On the above mentioned website, you will find the necessary information to register for this social event.

Kind regards,

Dr. Annik Van Keer
Chair Introduction Committee
Graduate School of Natural Sciences
